- Tagalog
- Tamil
- Telugu
- Turkish
- Ukrainian
- Urdu
- Vietnamese
- Welsh
- Yiddish
- Yoruba
- Zulu

Text-to-text means you type the message out in English, and Connect 5 will translate it into the indicated language. For email and SMS, this is sufficient. For phone, the script will be translated, but you would need someone to call in to record the message in that language.

Text-to-speech means you type the message out in English, Connect 5 will translate the text into the indicated language, *and be able to read it in a computerized voice in that language*. After translating, your message can be sent without further adjustment.

NOTE: Items marked with an * in the list above indicate that the language is a double-byte language and may require additional language packs installed on your Operating System.

If you cannot view these double-byte characters, contact your institution's IT department for more information.
